Work Experience

Wazobia Technologies   *Lagos, NG*
Software Engineer   *April 2023 - Current*
- Developed and integrated a form service for the user-generated forms using laravel, enhancing data collection capabilities.
- Created and Implemented three templates (Eatup, Elegante and Exciting Meals) for website page creation.
- Worked closely with the design team to create the Hivedeck website by transforming figma wireframes into code and ensuring full responsiveness across different screens.
- Created the Website Page Editor v2 for the hivedeck website to enable users to customize their website pages easily, adding features such as Drag and Drop to enable users drag blocks from the block library into the Editor.
- Created a custom carousel slider using gsap to be used in the templates, thereby stripping out dependency of the templates to a 3rd party library.
- Gained expertise in Laravel GraphQL, applied to project development.
- Created a payment service using NestJs.

Dreamtech Labs   *Remote, California,USA*
Software Engineer   *August 2022 - April 2023*
- Part of a team developing a website builder platform.
- Led front-end development using Next.js and backend with Node.js
- Developed client-facing applications and integrated secure payment gateways.
- Provided technical support and training for smooth client onboarding.

Pavestones Legal   *Lagos, NG*
